

HECTOR MENDEZ

Construction Technology Specialist • BIM Coordinator • Remote Project Manager

Las Vegas, NV | me@hectormendez.io | hectormendez.io | Open to Remote / Contract Roles

PROFESSIONAL SUMMARY

Construction Technology Specialist and Computer Science Engineer with 21+ years of experience bridging field operations and digital systems. Expert in 3D rendering, project estimation, BIM coordination, and building custom software tools for construction workflows. Proven ability to manage multi-state projects remotely, optimize costs, and deliver technical solutions that reduce risk and improve project transparency. Bilingual (English/Spanish) with a track record of securing long-term contracts through technology-driven efficiency.

CORE COMPETENCIES

3D Rendering & Visualization	Remote Project Management	Cost Estimation & Bidding
BIM Coordination (SketchUp/AutoCAD)	Construction Software Development	CPM Scheduling & Reporting
FOB/CIF Material Procurement	Multi-trade Bid Management	IT Systems & Infrastructure

PROFESSIONAL EXPERIENCE

Supervisor Manager | ESC Federal • AREA15, Las Vegas, NV • 2024 – Present

- Supervise a cleaning and sanitation team at AREA15, a high-traffic entertainment venue in Las Vegas, ensuring all areas meet cleanliness and hygiene standards throughout each shift.
- Enforce sanitation protocols, safety standards, and federal contractor compliance requirements across all cleaning operations under ESC Federal's scope of work.
- Coordinate team scheduling, assign daily tasks, and resolve on-site issues to maintain consistent service quality and operational efficiency across the venue.

Construction Technology Specialist & IT Manager | RDI • Las Vegas, NV • 2021 – 2024

- Designed and deployed a full inventory and tracking system from scratch, replacing manual processes for a construction developer operating across multiple states.
- Built a custom in/out logistics system with CPM-based scheduling, improving delivery coordination and reducing project delays.
- Managed end-to-end estimation and bidding for electrical, carpentry, and stonework contracts — calculating FOB/CIF material costs and coordinating factory deliveries.
- Led 3D rendering and visualization for future development projects, enabling client presentations and stakeholder approvals.
- Managed multi-state stone projects and secured a 3-year contract by identifying cost-saving opportunities and optimizing supply chain workflows.
- Developed scheduling and reporting dashboards to improve project transparency and financial profitability tracking.
- Liaised directly with international factories to define prototype specifications and refine production guidelines.

IT Manager & Systems Administrator | AUDICON S.A. De C.V. • El Salvador (Multinational) • 2015 – 2022

- Architected and deployed a dedicated server infrastructure, replacing legacy systems and enabling automated daily backups and high availability.
- Implemented a secure internal messaging and communications platform meeting corporate security requirements.
- Upgraded full network infrastructure — identified and resolved critical vulnerabilities and planned long-term IT investment roadmap.
- Maintained and modernized company hardware fleet, extending device lifespan and improving operational efficiency.

Co-Founder & Technology Director | ALSW Tech • El Salvador • 2008 – 2020

- Co-founded and scaled a technology company from \$40K to \$80K in annual operations over 8 years.
- Delivered machine automation, hardware design, and software solutions to local businesses and expanded to U.S. factory contracts (confidential prototypes).

- Advised government agencies, corporations, and universities on 3D printing, IoT, and emerging technology adoption.
- Featured speaker at international technology events; built professional connections with leaders from Intel, Google, SparkFun, and Adafruit.

Operations & Financial Manager | Cars Mendez / Importaciones Hector Mendez • El Salvador • 2005 – 2025

- Managed financial operations including international wire transfers, inventory control, and government compliance documentation for a 35-year family business.
- Liaised with auto auction partners to resolve operational issues and ensure seamless business continuity.

TECHNICAL SKILLS

Construction	SketchUp, AutoCAD, 3D Rendering, CPM Scheduling, Estimation, Procore (familiar), Bluebeam (familiar)
Project Mgmt.	Remote project coordination, multi-trade bidding, FOB/CIF procurement, risk analysis, contract management
Software Dev	Python, JavaScript, PHP, HTML/CSS, C++, C#, Java — web apps, automation tools, inventory systems
Databases	MySQL, Oracle, MariaDB — data-driven reporting and construction analytics
Hardware / IT	Network infrastructure, server deployment, hardware design (KiCad, Eagle CAD), IoT, electronic prototyping
Design	Adobe Suite, SketchUp, Inkscape, GIMP — technical drawings and project visualization
Office Tools	Microsoft Office (Excel advanced), Google Suite, project reporting and financial dashboards
Languages	English (Professional) Spanish (Native)

EDUCATION & CERTIFICATIONS

- B.S. Computer Science Engineering** — Don Bosco University • 2008–2016
- MBA, Financial Management** — Washington Business School • 2018
- Web Development** — University of Alicante (Online) • 2017
- AI for Business & Productivity (In Progress):** Platzi (Online) & Self-Directed Video Learning • 2024 – Present
